

# MYANMAR

## FAST FACTS FROM THE 2015-16 MYANMAR DHS

The 2015-16 Myanmar Demographic and Health Survey (MDHS) is designed to provide data for monitoring the population and health situation in Myanmar. The 2015-16 MDHS is the first DHS conducted in Myanmar.

### FERTILITY and FAMILY PLANNING

Women in Myanmar have an average of 2.3 children.

1/2

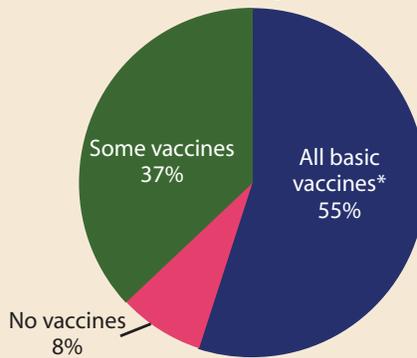

of married women age 15-49 use a modern method of family planning.

### CHILD HEALTH

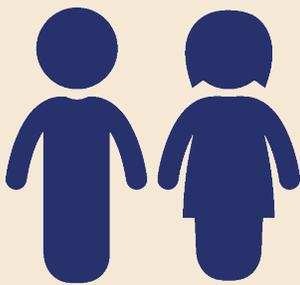

1/2 of children age 12-23 months have received all basic vaccinations

Childhood vaccinations  
Percent of children age 12-23 months

\*Basic vaccines include one dose each of BCG and measles and three doses each of DPT-containing vaccine and polio

### CHILDHOOD MORTALITY

Created by Delwar Hossain from Noun Project

1 in 20 Myanmar children does not survive until their 5th birthday (under-five mortality rate of 50 deaths per 1,000 live births).

### MATERNAL HEALTH

3 in 5 women age 15-49 attended 4+ antenatal care visits.

Just over 1/3 of births were delivered in a health facility.
