The 2014 Kenya Demographic and Health Survey (KDHS) is designed to provide data for monitoring the population and health situation in Kenya. The 2014 KDHS is the sixth Demographic and Health Survey conducted in Kenya since 1989. A nationally representative sample of 31,079 women age 15-49 and 12,819 men age 15-54 in selected households were interviewed. This is the first KDHS that includes county-level data.
