

# Tajik Households: Results from the 2012 TjDHS

The 2012 Tajikistan Demographic and Health Survey (TjDHS) provides up-to-date information on the population and health situation in Tajikistan. The 2012 TjDHS is the first national demographic and health survey conducted in the country.

The household questionnaire in the TjDHS captures information on drinking water, sanitation, household possessions, household membership, and educational levels.

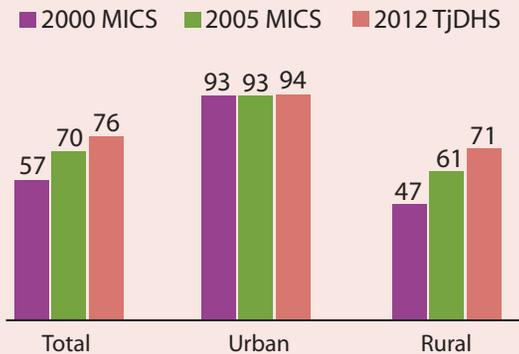

## Drinking Water

Percent of households with an improved source of drinking water

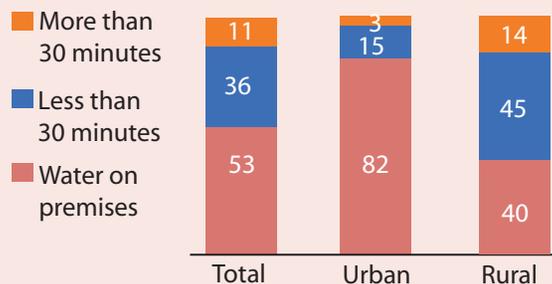

## Trends in Use of Improved Drinking Water

Percent of population with an improved source of drinking water

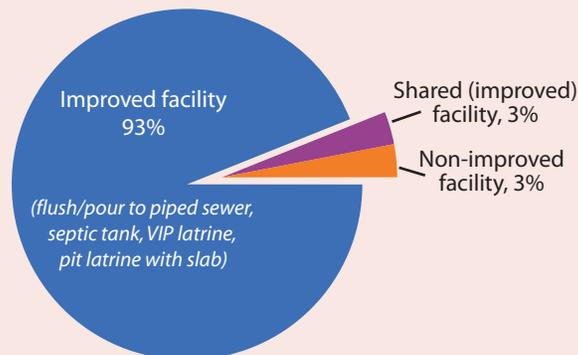

## Distance to Drinking Water

Percent of households by time to obtain drinking water (round trip)

## Sanitation Facilities

Percent distribution of households

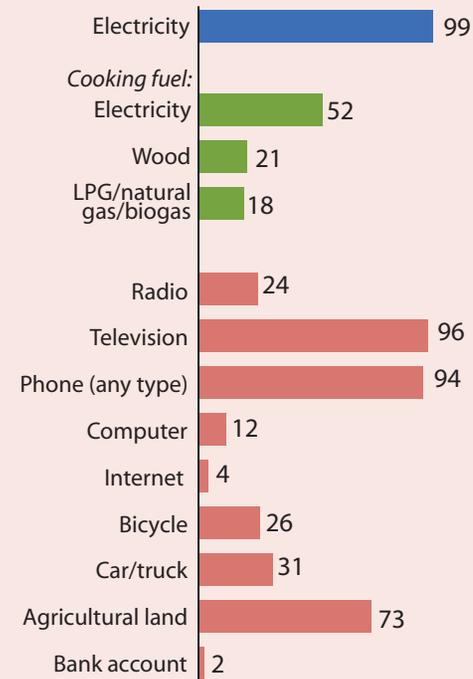

**1 in 5** households is *headed by a woman*.

**38%** of household members are *under age 15*.

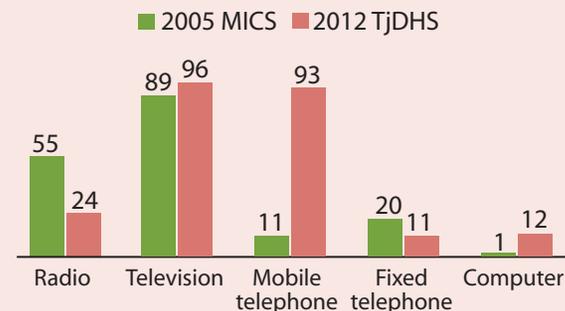

## Household Characteristics and Possessions

Percent of households with selected items

## Trends in Ownership of Household Goods

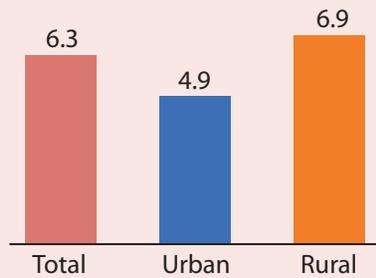

Percent of households with household items

# Household Characteristics

## Household Size

Average number of household members

## Education of Household Members

Percent distribution of household population by highest level of schooling attended or completed

The 2012 Tajikistan Demographic and Health Survey (TjDHS) was conducted by the Statistical Agency under the President of the Republic of Tajikistan (SA) and the Ministry of Health (MOH) of the Republic of Tajikistan from July 2012 through September 2012. ICF International provided technical assistance for the survey through the USAID-funded MEASURE DHS program. Funding for the TjDHS was received from USAID/Tajikistan, the United Nations Population Fund (UNFPA) Tajikistan.
