

Maternal and Child Health: Results from the 2012 TjDHS

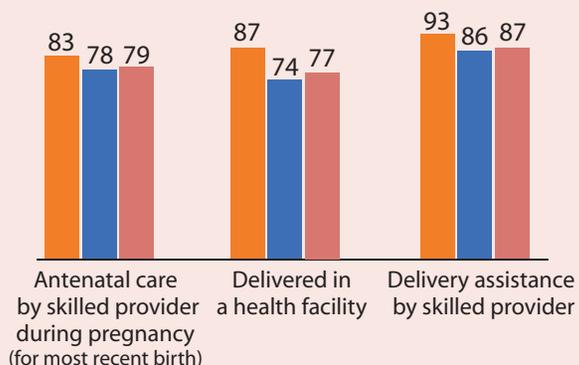

The 2012 Tajikistan Demographic and Health Survey (TjDHS) provides up-to-date information on the population and health situation in Tajikistan. The 2012 TjDHS is the first national demographic and health survey conducted in the country.

The 2012 TjDHS included questions on antenatal care, delivery care, and postnatal care, as well as questions on childhood vaccinations, illnesses, and mortality.

Maternal Health Care by Residence

Urban Rural Total

Percent of women 15-49 with a live birth in the 5 years before the survey

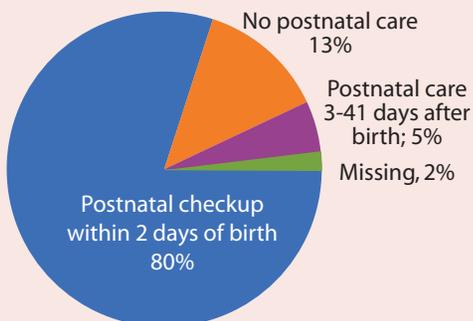

Timing of Antenatal Care

53% of pregnant women received the recommended 4+ antenatal care visits

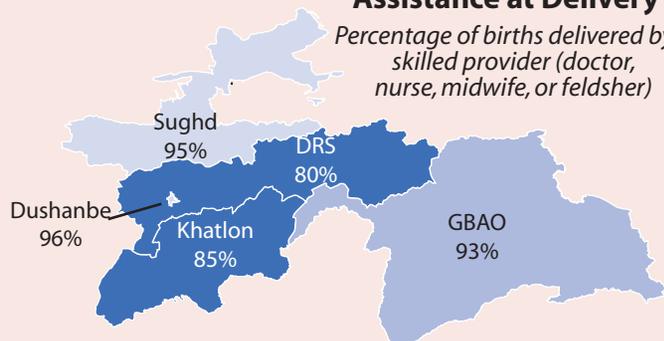

52% of women attended their first ANC visit during their 1st trimester of pregnancy, as recommended.

Timing of Postnatal Care

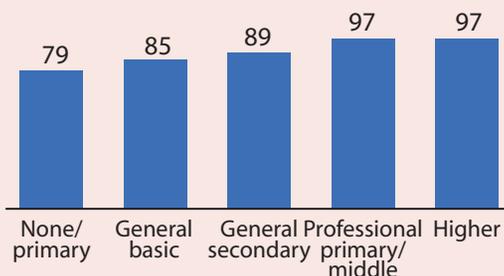

Assistance at Delivery

Percentage of births delivered by a skilled provider (doctor, nurse, midwife, or feldsher)

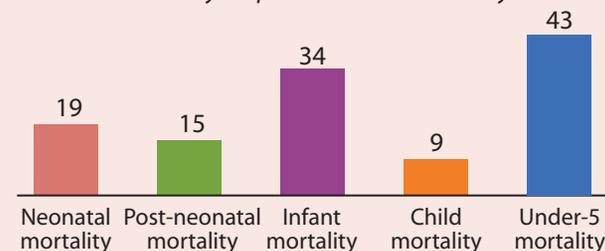

Delivery Assistance by Education

Percentage of births delivered by a skilled provider (doctor, nurse, midwife, or feldsher)

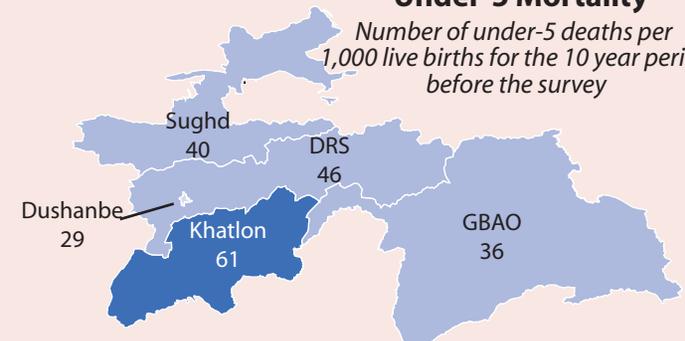

Childhood Mortality

Deaths per 1,000 live births for the 5 year period before the survey

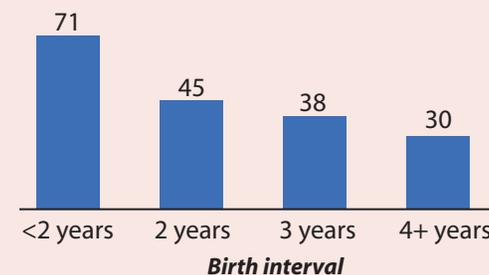

Under-5 Mortality

Number of under-5 deaths per 1,000 live births for the 10 year period before the survey

Under-5 Mortality by Birth Interval

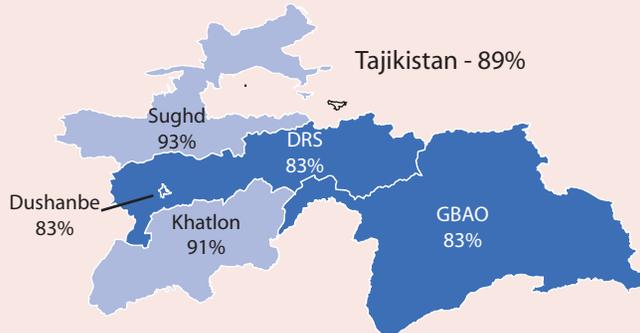

Number of under-5 deaths per 1,000 live births for the 10 year period before the survey

Maternal and Child Health

Vaccination coverage

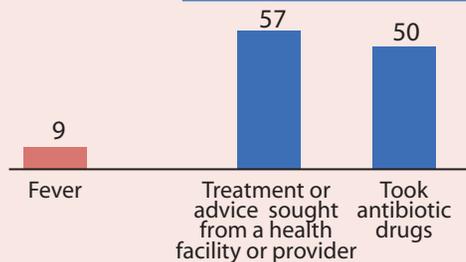

Percentage of children 18-29 months who have received all basic vaccinations (BCG, measles or MR, and 3 doses each of DPT/pentavalent and polio)

Prevalence and Treatment of Fever

Percentage of children under 5 with fever

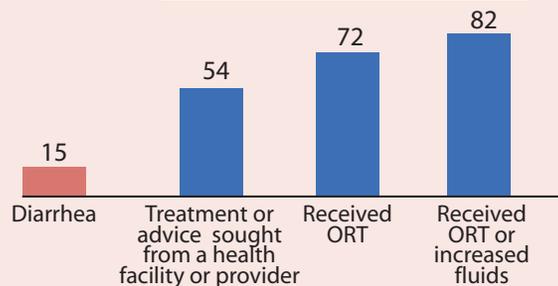

Among children with fever, percentage receiving treatment

Prevalence and Treatment of Diarrhea

Percentage of children under 5 with diarrhea

Among children with diarrhea, percentage receiving treatment
