

Maternal and Child Health: Results from the 2012 KgDHS

The 2012 Kyrgyz Republic Demographic and Health Survey (KgDHS) provides up-to-date information on the population and health situation in the Kyrgyz Republic. The 2012 KgDHS is the second national demographic and health survey conducted in the country.

The 2012 KgDHS included questions on antenatal care, delivery care, and postnatal care, as well as questions on childhood vaccinations, illnesses, and mortality.

Trends in Maternal Health Care

■ 1997 KgDHS ■ 2012 KgDHS
Percent of women 15-49 with a live birth in the 3 years before the survey

Timing of Antenatal Care

84% of pregnant women received the recommended **4+ antenatal care visits**

79% of women attended their first ANC visit during their **1st trimester** of pregnancy, as recommended.

Components of Antenatal Care

Timing of Postnatal Care

Vaccination Coverage by Wealth Quintile

Delivery Assistance

Vaccination Coverage

Percent of children age 18-29 months with all basic recommended vaccinations
*figures in parentheses are based on 25-49 unweighted cases

Maternal and Child Health

Trends in Childhood Mortality

Deaths per 1,000 live births

Under-5 Mortality by Birth Interval

Number of under-5 deaths per 1,000 live births for the 10 year period before the survey

Prevalence and Treatment of Fever

Percentage of children under 5 with fever

Among children with fever, percentage receiving treatment

The 2012 Kyrgyz Republic Demographic and Health Survey (KgDHS) was conducted by National Statistical Committee of the Kyrgyz Republic and the Ministry of Health from August 2012 through December 2012. ICF International provided technical assistance for the survey through the USAID-funded MEASURE DHS program. Funding for the KgDHS was received from USAID/Kyrgyz Republic. The United Nations Population Fund (UNFPA) provided funding for printing. Cover photo, © 2006 Anara Doolotova, Courtesy of Photoshare
